DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rela of record for reasons of record and further in view of Sato, EP 1 172 145 A2.

The Rela patent while disclosing the use of pumps to transport the water through the electrodeionization apparatus, fails to disclose the use of the pumps to connect the outlet to the inlet of the second compartment as claimed.

The Sato patent is cited to show the use of a pump to connect the outlet to the inlet of the second compartment, which is said to restrict the diffusion of silica from the concentrating compartment (see abstract).

Consequently, the invention as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Rela patent with the teachings of the Sato reference, because the Sato reference teaches the use of the pump to feed a portion of the concentrate from the outlet to the inlet. Furthermore, the third liquid circuit would inherently exist, because only a portion of the concentrate is recycled back to the inlet.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
